**The CIA is an Instrument of Capitalists:****THE NEFO FLOWER BLOSSOMS TO SPREAD FRAGRANT SCENT**

Pleasant smelling flowers are found everywhere. What is said by this proverb is true; the NEFO powers are now blossoming in every part of the world especially in Africa, Asia and Latin America, spreading their fragrant scent. It is certain and clear that the powers of the NEFO are exactly the opposite of the OLDEFO (Old Established Forces) which become withered and leave an unpleasant odor behind.

Who does not know the name of Cambodia which rises higher and higher? People throughout the world speak of Algeria. Tanzania is well-known in East Africa. Cuba champions the American hemisphere. The Soviet Union is the comrade in arms of national independence fighters in Africa. The USA is afraid of the RRT (People's Republic of China). Indonesia is well-known as a country which is most stubborn to fight against neo-colonialists. The name of Indonesia is high like a rocket in its highest orbit.

But on the contrary, who does not know the name of England which is like a tiger without any teeth trying to free itself from fetters, especially the USA that is without power, for its monopolistic nuclear teeth have fallen out and in addition to that, it is black and blue from attacks and spreads an odor... signs of putrefaction show that it is nearing its end!

The USA began to be crushed in Venezuela. US intervention in the Congo placed Tshombe in a Government seat which is becoming shattered due to the attacks from independence fighters. In South Vietnam, the USA is waiting for the time when it will be driven away by US arms which were imported from the USA, 10,000 kilometers away. US arms that have been imported amounted to more than US\$5 billion. One of the reasons of the US downfall and collapse everywhere is the result of the stubborn attitude of the CIA which often times interfered in the domestic affairs of other people including Indonesians. Bung Karno has cursed and condemned CIA's interference in Indonesia's domestic affairs.

It is certain that the CIA must carry out a reactionary policy because it is a fact that the CIA is an instrument of US monopolistic capitalists who take shelter under the powers of the State; often times it was said that the CIA is a business or industry, beside the General Motors, the Dupont ammunition factory, the Lockheed plane factory, etc. People in other countries cannot sufficiently understand the working system of the CIA and the CIA is hated in the USA because it is full of secrets. But what was kept a secret was revealed by the actions of the CIA. Its actions clearly revealed its evil intention.
